

BUI DUC PHU

PHP Backend Developer

0856800200

buiducphu.266@gmail.com

Vu Tong Phan, Thanh Xuan, Ha Noi

OBJECTIVE

With nearly 4 years of experience delivering end-to-end PHP web projects, including over 1 year in a team lead role, I am seeking an opportunity to contribute my skills and grow together with the company. I am passionate about learning new technologies and constantly expanding my knowledge to improve both technically and professionally. My long-term goal is to become a strong and effective technical leader who can drive teams forward and deliver meaningful results.

WORK EXPERIENCE

Pos System

05/2023 - Present

PHP BACKEND DEVELOPER

Your team size: 20

Technology description:

Technology Stack:

- Backend: PHP (CakePHP)
- Frontend: jQuery, Vue.js, HTML, CSS
- Database: MySQL
- Others: Git, Docker, PHP-based Cronjob

Achievements & Skills Gained:

- Delivered high-quality features on time with minimal QA bugs.
- Gained solid experience in large-scale data processing and backend optimization.
- Strengthened understanding of microservice architecture, internal API design.
- Improved knowledge of system architecture and scalable backend design.
- Developed a centralized POS web platform for booking and managing all core business data, including products, therapists, shops, and customers, ...
- Built PHP batch jobs for automation and cross-service data sync, ensuring smooth and consistent microservice operations.
- Designed centralized APIs as data hub for microservices (real-time communication).
- Optimized SQL for 100M+ record tables, significantly improving performance.
- Handled daily bug fixing, maintenance, and fast-turnaround feature requests.
- Proposed architectural improvements for better scalability and reliability.
- Provided onboarding support and technical training for new team members.

Product Pricing Management System

02/2025 - Present

TEAM LEAD

Your team size: 5

Technology description:

Technology Stack:

- Backend: PHP (CakePHP)
- Frontend: jQuery, HTML, CSS
- Database: MySQL
- Others: Git, Docker, PHP-based Cronjob

Achievements & Skills Gained:

- Delivered accurate estimates and high-quality system designs adopted throughout the project.
- Strengthened client relationships through direct communication and iterative feedback.
- Applied AI tools (e.g., ChatGPT) to streamline UI prototyping and reduce development time.
- Successfully transitioned business logic from manual DB operations to maintainable, scalable UI workflows.

- Acted as the primary contact with the client, participating in all phases of the project lifecycle from requirement clarification to delivery.
- Took full ownership of effort estimation and system design, delivering a scalable architecture aligned with business workflows.
- Led the development of a centralized GUI-based pricing system, replacing manual DB updates with configurable logic.
- Managed task planning, tracked team progress, and provided weekly reports to the PM.
- Reviewed team code, mentored junior members, and supported integration of complex logic.
- Personally developed ~80% of the front-end UI.

Information Encryption Project

08/2024 - 02/2025

TEAM LEAD

Your team size: 5

Technology description:

Technology Stack:

- Backend: PHP (CakePHP)
- Frontend: jQuery, Vue.js, HTML, CSS
- Database: MySQL
- Others: Git, Docker, PHP-based Cronjob

Achievements & Skills Gained:

- Successfully delivered a secure encryption module and received high recognition from both the client and Project Manager.
- Managed the full security project lifecycle: from analysis and architecture to rollout and release planning.
- Strengthened leadership, cross-team coordination, and technical decision-making in a high-impact environment.
- Gained hands-on experience with release safety, rollback planning, and secure data integration techniques.
- Led a security-critical project to encrypt customer data and prevent exposure of sensitive information across the platform.
- Worked directly with the client to define requirements, estimate effort, design system architecture, and assess technical impact.
- Took full ownership of the encryption logic implementation and integrated it with the legacy database and business flows.
- Coordinated project planning, task distribution, and weekly reporting to stakeholders.
- Reviewed team code and provided hands-on support to resolve encryption-related issues.
- Defined and documented release and rollback strategies in collaboration with the system architect.

Therapist Scheduling & Information Portal

01/2022 - 05/2023

PHP BACKEND DEVELOPER

Your team size: 10

Technology description:

Technology Stack:

- Backend: PHP (Zend Framework)
- Frontend: HTML, CSS, jQuery
- Database: MySQL
- Others: Cronjob (PHP), Git, Postman

Achievements & Skills Gained:

- Delivered stable, production-ready features on time with high code quality and minimal revisions.
- Built strong hands-on experience in working with microservices and service coordination.
- Deepened understanding of backend performance tuning, secure data handling, and scalable service design.

- Demonstrated proactiveness by frequently suggesting logic improvements that optimized user experience and operational processes.
- Developed and maintained a web portal for therapists to manage work schedules, view announcements, job postings, and internal messages.
- Handled daily client requests: fixed bugs, enhanced existing features, and implemented new ones based on real user feedback.
- Built PHP cronjobs to automate key background tasks such as late attendance alerts and salary calculation by working days.
- Designed and documented internal APIs for reliable integration with other services in a microservices environment.
- Worked on critical business logic including appointment booking, salary tracking, and attendance – directly improving system accuracy and UX.
- Provided technical recommendations to enhance system scalability, performance, and business flow efficiency.

EDUCATION

10/2018 - 06/2022

INFORMATION TECHNOLOGY

University of Transport and Communications

GPA: 3.1/4

SKILLS

LANGUAGE

English: 450 TOIEC

Japanese: N5

SOFT SKILLS

- Teamwork
- Quick Problem Solving
- Task Management
- Communication
- Working Under Pressure
- Technical Documentation
