

VAN PHUC

Laravel Developer

Personal Information

- 📞 0964505836
- ✉️ dangphucvghy195@gmail.com
- 📅 12/02/2003
- 📍 Van Giang Town, Hung Yen, Vietnam

Summary of outstanding skills

- Have internship experience at a software company using Node.js, React, and MySQL.
- Good at using Laravel (version 10) and finished many personal projects about ordering and payment systems.
- Have logical thinking, can work well in a team, and learn new things quickly.

Skills

Technical Skills:

Frontend: HTML, CSS, jQuery, Bootstrap, JavaScript, Vue.js, Blade (Laravel), React.
Backend: PHP (Laravel), Node.js
Database: MySQL, SQL

Career Goals

Short-term: Apply for the position of *Laravel Developer* to use my knowledge, gain real work experience, improve problem-solving skills, and help develop software systems.

Long-term: Become a professional programmer who can build large systems and support digital transformation projects.

Work Experience

Programmer

01/2025 - 05/2025

Company: BlueOC Software

Tasks:

- Create a user registration feature with email confirmation using Node.js and React for the CMS system.
- Build an API to update contract status.
- Make sure the design looks the same in all parts of the website and help fix bugs.
- Work with MySQL in a Docker environment for development and testing.
- Work with team members to solve technical problems and keep the project on time.
- Help other team members with hard features and give feedback on source code during development.

Technology: React, Node.js(Express.js), MySQL (Dockerized)

Education

Major: Software Engineering

2021 - 2025

Hung Yen University of Technology and Education

Major: Web Technology

Personal project

FULLSTACK DEVELOPER

05/2024 - 08/2024

Build a website to sell food online

Description: Build an e-commerce website to sell food, helping users place orders, track orders, and manage products and sales.

Number of participants : 1

Technology: PHP (Laravel 10), MySQL, HTML, CSS, JavaScript, Bootstrap, Visual Paradigm

Main tasks:

- Analyze requirements and design the system using Visual Paradigm.
- Build customer and admin interfaces using Blade and Bootstrap.

Tools: GitHub, Postman, Visual Paradigm, Figma

Soft Skills

- Teamwork skills
- Self-learning skills
- Effective communication skills
- Problem-solving skills
- Time management skills

Languages

English:
Basic (Read and understand documents)

Additional Information

I am willing to learn and adapt to new technologies.

- Create features: sign up/login, shopping cart, payment, invoice, and sales report.
- Improve speed and user interface/user experience for the homepage and product detail pages.
- Add CSS effects to make the website better for users.
