- **Role-based access control** (Admin, Editor, Writer).
- **Advanced search and category-based filtering.**
- **SEO-friendly structure** (optimized meta tags, sitemap, SEO-friendly slugs).
- **Comment management** with moderation before publishing.
- **Image/video upload and media management.**
- **Most-read and featured articles functionality.**
- **Fully responsive across devices.**

- **E-commerce Website**
  - **Framework:** Laravel.
  - **Responsibilities & Features:**
    - **Shopping cart, checkout process, and discount code management.**
    - **Product management with variants** (size, color, etc.) **and SKU tracking.**
    - **Inventory management for each product/variant.**
    - **Order tracking with status updates** (Pending → Shipping → Completed).
    - **Integration of online payment gateways** (VNPay, Momo, PayPal, etc.).
    - **Product filtering and sorting** (price, category, brand).
    - **Customer management and purchase history tracking.**
    - **Dashboard displaying revenue and order statistics.**

- **Class Management System Website**
  - **Framework:** Laravel.
  - **Responsibilities & Features:**
    - **Management of students, classes, and courses.**
    - **Role-based permissions** (Admin – Teacher – Student).
    - **Uploading and managing course materials** (documents, videos).
    - **Assignment creation, submission, and grading workflows.**
    - **Class schedule, attendance tracking, and notifications.**
    - **Learning progress tracking for each student.**
    - **Online examinations** (multiple choice and essay-based).

- **Warehouse Management System Website**
  - **Framework:** Laravel.
  - **Responsibilities & Features:**
    Multi-warehouse management: managing multiple warehouses, batches, and products.
    Document handling: goods receipt (import), goods issue (export), and warehouse transfers.
    Inventory checking: periodic stocktaking and audit logs.
    Account & role management: role-based access and permission restrictions for each module.
    Low-stock alerts and automatic quantity calculations.
    Supplier and purchase order management.
    Real-time quantity tracking by product/SKU.
    Comprehensive Dashboard:
    - **Inventory statistics** (stock levels, near-expiry items, best-selling products).
    - **Warehouse value, depreciation tracking, and revenue analysis.**
    - **Customizable charts by day, month, or quarter.**
    Settings:
    - **Configurable stocktaking notifications** (automatic cycle-based or manual schedules).
    - **Customizable document code formats.**

- **Stocktaking rules, audit cycles, and role-based access configurations.**
