### WORK EXPERIENCE

#### PHP DEVELOPER

July 2022 - May 2025

##### Next Generation Mobile Services. JSC

- Developed and maintained web applications using Laravel and Vue.js, ensuring high code quality, security, and maintainability in a full-stack environment
- Executed full-stack technical tasks, handling back-end development in PHP, front-end interfaces in Vue.js, database management, and system integrations to deliver end-to-end solutions
- Collaborated cross-functionally with business stakeholders to analyze requirements and propose scalable technical solutions, effectively bridging the gap between product vision and engineering execution
- Implemented CI/CD pipelines with Jenkins, Docker, Kubernetes, and GitLab, and monitored system performance via Kibana, reducing deployment time and improving system uptime significantly
- Awarded "Employee of the Year 2023" for outstanding performance, innovation in development processes, and dedication to delivering business value on time

#### PHP INTERN

November 2021 - March 2022

##### Monstar Lab Vietnam

- Adhered to PSR-12 coding standards to ensure clean, consistent, and maintainable PHP code across all projects
- Containerized development environments with Docker, streamlining setup, build, and deployment processes to minimize "it works on my machine" issues
- Implemented Laravel Jetstream for authentication scaffolding (including two-factor auth and session management); repository available at [github.com/DTP-IT/laravel-jetstream](https://github.com/DTP-IT/laravel-jetstream)
- Applied best practices in an enterprise setting, leveraging coding conventions and modern tooling to boost team productivity and code quality.
