

Ha Huy Tuan

Middle PHP / Full-stack Developer (Laravel, React, Vue)

Phone: 0968954324

Email: hhtuan206@gmail.com

Address: Thanh Hoa, Viet Nam

Website: <https://www.linkedin.com/in/tuanhh206>

SUMMARY

- Middle PHP / Full-stack Developer with 3+ years of experience building scalable web applications using Laravel, React, and Vue.
- Strong background in RESTful API development, microservices-based systems, and AWS cloud deployment with CI/CD automation.
- Seeking a role where I can contribute to system performance, stability, and code quality while continuing to deepen my technical expertise and support team growth.

EDUCATION

2018 - 2022 **University of Transport Technology**
Software Engineering
GPA: 3.25/4

WORK EXPERIENCE

2/2022 - Present **AMELA JSC**
Web Developer

- Developed and maintained backend systems using Laravel for multiple outsourcing projects.
- Designed RESTful APIs and database schemas for small to medium-scale systems.
- Deployed and maintained cloud infrastructure on AWS (EC2, RDS, S3, IAM).
- Optimized SQL queries and backend logic, reducing response time by up to 30%.
- Mentored interns and junior developers through task assignment and code reviews.

SKILLS

Backend PHP (Laravel), RESTful API, Microservices

Frontend ReactJS, VueJS, JavaScript, HTML, CSS

Databases MySQL, PostgreSQL

Cloud & DevOps AWS (EC2, RDS, S3, IAM, VPC, R53, Rekognition, CloudWatch), Docker, CI/CD

Tools Git, GitLab CI, GitHub Actions, Bitbucket

Other Skills System Design, Agile/Scrum, Task Estimation

HIGHLIGHT PROJECTS

2/2025 - Present **YST ERP**
Web Developer
Client: Private
Team Size: 4

Technologies Used: Laravel (PHP), ReactJs, VueJs, RDS MySQL

Responsibilities:

- Maintained and stabilized a microservices-based ERP system serving multiple business modules.
- Optimized backend logic and SQL queries, improving response time by ~30–35% for core workflows.
- Implemented breaking changes while ensuring data consistency across distributed services.
- Diagnosed and resolved complex production issues to maintain high system availability.

11/2024 - 2/2025

MEETING SYSTEM

Web Developer

Description: A high-performance video conferencing platform designed for seamless enterprise collaboration and remote meetings.

Client: Private

Team Size: 6

Technologies Used: Laravel (PHP), JavaScript, MySQL.

Responsibilities:

- Built and managed multi-environment infrastructure (Dev / Staging / Production).
- Designed and implemented CI/CD pipelines, automating deployment and testing.
- Integrated and customized Jitsi Meet for enterprise video conferencing.
- Led task estimation and mentored junior developers through code reviews and technical guidance.

5/2024 - 10/2024

E-LEARNING

Web Developer

Description: An interactive online education system featuring AI-driven student monitoring and optimized content delivery.

Client: Private

Team Size: 6

Technologies Used: Laravel (PHP), JavaScript, MySQL.

Responsibilities:

- Implemented AI-based facial recognition for automated student attendance tracking.
- Developed chunk-based file upload, reducing large-file upload latency by ~50%.
- Automated CI/CD workflows and managed cloud environments.
- Took ownership of task breakdown, estimation, and delivery milestones.

10/2024 - 12/2024

REA

Web Developer

Description: A smart shared-taxi platform optimizing urban mobility by connecting multiple passengers with similar routes to reduce travel costs.

Client: Private

Team Size: 5

Technologies Used: Laravel (PHP), JavaScript, MySQL.

Responsibilities:

- Containerized applications using Docker, ensuring consistent environments across stages.
- Automated CI/CD pipelines and performed major framework upgrades (Laravel, Next.js).
- Implemented load balancing strategies to improve scalability and traffic handling.
- Coordinated technical planning and delivery with stakeholders.

10/2023 - 2/2024

NUMATA-DELIVERY

Web Developer

Description: A logistics and delivery management platform connecting stores, shippers, and warehouse workers in real-time.

Client: Private

Team Size: 15

Technologies Used: Laravel (PHP), React Native, ReactJS, PostgreSQL.

Responsibilities:

- Developed real-time messaging and calling features for logistics coordination.
- Built automated statistical reporting systems for delivery performance tracking.
- Designed PostgreSQL schemas optimized for high-frequency transactions.
- Delivered assigned modules on schedule under strict deadlines.

SAKURA CRANE

Web Developer

Description: An integrated registration and management platform for crane operator licensing courses, specifically designed for the Japanese vocational training market.

Client: Private

Team Size: 6

Technologies Used: Laravel (PHP), Python, JavaScript, PostgreSQL.

Responsibilities:

- Developed automated image background removal during upload processing.
- Authored technical documentation in Japanese to support offshore collaboration.
- Provided technical estimates and guided junior engineers through best practices.

10/2022 - 3/2023

TEMPLATE MAKING

Web Developer

Description: A specialized Legal-Tech platform providing automated legal document generation, expert consultation booking, and a comprehensive database for Japanese labor laws.

Client: Private

Team Size: 9

Technologies Used: Laravel (PHP), MySQL, Flask (Python), VueJs.

Responsibilities:

- Integrated Stripe and Square payment gateways for global transactions.
- Built an AI-powered Q&A assistant using website data.
- Deployed Flask-based microservices for specialized backend processing.
- Automated CI/CD pipelines and containerized services with Docker.

2/2022 - 10/2022

REQUEST MANAGEMENT SYSTEM

Web Developer

Description: An internal enterprise system designed to automate and track service requests and administrative workflows.

Client: Amela

Team Size: 9

Technologies Used: Technologies Used: Laravel (PHP), MySQL, ReactJS.

Responsibilities:

- Designed and implemented RESTful APIs for internal enterprise workflows.
- Developed new business features and optimized MySQL schemas.
- Conducted technical analysis and effort estimation aligned with client requirements.

ADDITIONAL INFORMATION

- Mentored junior developers through task assignment and code reviews.
- Strong experience in requirement analysis and technical documentation.
- Comfortable working in Agile teams and collaborating with international clients.
