OBJECTIVE

I'm a Web Developer with 2 year of experience in building and maintaining web applications. I specialize in PHP and Laravel Framework, focusing on developing scalable back-end systems and integrating front-end features. I enjoy solving programming challenges, and writing clean, maintainable code while continuously learning new technologies to improve my skills.

TECHNICAL SKILLS

- Programming Languages:** PHP, Javascript
- Frameworks/Platforms :**
- + Laravel, Restful API, Composer
 - + Basic Vuejs, Jquery, Bootstrap, Tailwind CSS
 - + WordPress, Strapi CMS
- Database/Management Systems:** MS SQL Server, MySQL
- Others:**
- + GIT
 - + Good understanding of OOP methodologies, SOLID principles
 - + SSH, Linux Command Line, Basic Server Management via SSH, Basic Remote Server Administration, knowledge of Docker.
- Foreign Languages:** English - CEFR B1

WORK EXPERIENCE

EachShop (Startup Company)

October 2023 - Present

PHP Developer

Project: SmartPay Redirect System (4 members , 1 PM, 1 front-end, 2 back-end)

- **Description:** An intermediary payment management system with intelligent redirection, designed to handle payment transactions via PayPal. It is an admin panel for managing multiple types of online stores , with the capability of automatic redirection and payment account management
- **Tecnologies:**
 - + Frontend: Bootstrap, JavaScript, DataTables
 - + Backend: PHP 8+, MySQL, Custom MVC Architecture
 - + APIs: PayPal API, Telegram Bot API, IP Geolocation APIs
- **Responsibilities:**
 - + Developing a management system for stores and PayPal accounts
 - + Implemented intelligent redirect algorithm reducing manual processing by 80%
 - + Built multi-platform integration for WordPress, Strapi, and custom stores
 - + Developed automated security system (proxy/VPN blocking, geo restrictions).
 - + Designed real-time dashboard with analytics and automated Telegram notifications
 - + Maintained and extended codebase: resolved issues in redirect/PayPal modules, developed new features, and standardized logging system.
 - + Mentored new members : defined coding standards, created with A→C→PayPal flow docs, conducted PR reviews.
 - + Developed and operated cron jobs: automate account/domain checks, scheduled tasks and log rotation, Telegram incident alerts.

Project: Shop Strapi (4 members , 1 PM, 1 front-end, 2 back-end)

- **Description:** Developed a full-featured e-commerce platform using PHP and Strapi CMS, implementing modern web technologies and security best practices.
- **Technologies:**
 - + Frontend: Tailwind CSS, Bootstrap, JavaScript
 - + Backend: PHP 8+, Strapi CMS API, RESTful API integration
- **Responsibilities:**
 - + Built comprehensive admin dashboard managing orders, users, products
 - + Implemented secure authentication system with JWT tokens, Google reCAPTCHA, and session management
 - + Created intelligent payment processing supporting PayPal gateways (Standard/Smart Button) with priority algorithms
 - + Built automated security features including IP blocking, country restrictions, and whitelist/blacklist systems
 - + Implemented sales notification system to simulate real-time purchase activities
 - + Implemented coupon system with percentage/fixed discounts and automated validation.
 - + Automated email notifications for order status changes and updates

Additional Projects & Contributions:

- **Developed Python automation tools:** Data extraction and content cloning from platforms such as Pinterest and Manhwa sites.
- **WordPress Projects :**
 - + Fashion E-commerce Website: Built and customized a Wordpress WooCommerce website for a fashion store, including product catalog, size/color variations, payment gateway (PayPal), and responsive UI/UX design.
 - + Business & Service Showcase Website: Developed a WordPress-based company profile site to introduce services, integrate booking/contact forms, payment gateway (PayPal), SEO optimization
 - + Built an online comic reading website using the WordPress Madara theme, featuring chapter-based navigation, multiple reading modes , user accounts with bookmarking and rating, comment system, SEO optimization
- **Built custom WordPress plugins:**
 - + Payment gateway integration for WooCommerce.
 - + Multisite plugin for automated site cloning and management.
 - + Automated review and rating generator

EDUCATION

2021 - 2025

Bachelor of software engineer

HANOI UNIVERSITY OF INDUSTRY

- GPA: 3.12/4.0
- Final Year Project: Developed an online food ordering website using Laravel, integrated with real-time chat to enhance customer–restaurant interaction and improve overall user experience.
