Nguyễn Tuấn Anh

Fresher PHP ───────

- Short-term goal: Gain practical experience and develop PHP programming skills, especially with Laravel, in a professional environment.
- Long-term goal: Become a good PHP programmer, participate in large projects and contribute to the development of the business.

WORK EXPERIENCE

15/1/2024 - 1/8/2024

Technology Joint Stock Company Scapbot

Project Development Manager

* Design and develop automatic backlink software:
 - Build a system to automatically create backlinks on high-quality website platforms, forums, and social networks.
- Analyze and optimize the software structure to ensure backlinks are created naturally and in accordance with Google standards.
- Boost SEO effectiveness and bring websites to the top of Google:
- Provide instructions and train users to use the software effectively.
- Monitor and update the software to match changes in Google's algorithm.
* Results achieved:
- Help many websites reach top 1-3 Google in a short time.
- Significantly increase organic traffic and conversion rate for customers.
- The software is still operating stably and supporting many businesses to improve SEO effectiveness.

1/11/2024 - 1/12/2024

database management courses.

PROJECT

09/2024 - 12/2024

DreamNest hotel booking website

Team Leader

• Objective: Build an online booking system that helps customers easily search, book and pay through many methods.
• Technology used: PHP (Laravel), MySQL, JavaScript, HTML/CSS, TailWindCss.
• Main features:
  o Search hotel rooms by location, price, popularity, reviews and number of guests.
  o Display detailed room information and accompanying images.
  o Support booking, online payment via payment gateway PayPal.
  o Manage customer accounts and booking history.
  o Admin page for hotel managers to update room information, prices, amenities and revenue reports.
• Main tasks:
  o Divide work and manage progress of team members.
  o Design system architecture and ensure effective operation of core features.
  o Directly participate in developing booking management module and integrating payment gateway.
  o Check and ensure quality before deployment.

11/2023 - 12/2023

HotCoffee website

Team Leader

• Objective: Build an online platform that makes it easy for customers to buy coffee products, manage orders, and track deliveries.
• Technology used: PHP, MySQL, JavaScript, HTML/CSS, Bootstrap.
• Main features:
  o Diverse product catalog with detailed images, descriptions, and prices.
  o Shopping cart with the ability to increase/decrease product quantity and calculate total automatically.
  o Support online payment via ZaloPay payment gateway and cash on delivery (COD).
  o Manage user accounts, including purchase history and product reviews.
  o Admin page allows product updates, order tracking, and revenue reporting.
• Main tasks:
  o Plan and assign tasks to team members.
  o Develop shopping cart functionality and online payment process.
  o Integrate payment gateways and delivery systems.
  o Ensure system performance and security throughout the development process.
  o Test and debug the entire system before deployment.
