

## Phan Nguyen Hai Vinh

### DEVELOPER

#### PROFILE

- 📞 0934415610
- ✉️ vinhphan301@gmail.com
- 📍 Tan Phu, Ha Dong, Ha Noi

#### SKILLS

##### TECHNICAL SKILLS

- Experience working with **JavaScript** using **ReactJS** and **VueJS** frameworks.
- Experience working with **PHP** using **Laravel** and **CakePHP** frameworks.
- Experience working with **Python**, including development with the **Django** framework.
- Proficiency in working with relational databases such as **PostgreSQL** and **MySQL**.
- Knowledgeable and proficient in using **Git/GitHub** for source control and project management.
- Experience building solutions using **no-code/low-code** platforms.

##### LANGUAGES

- Use English well for work.
- Good English communication.
- TOEIC certificate 750.

##### SOFT SKILLS

- Problem-solving.

#### CAREER GOALS

I want to find a programming job in a professional and dynamic working environment to be able to promote my ability in developing quality software products in many different languages. A working environment with many challenges and development opportunities is the motivation for me to strive to become a good programmer.

#### EXPERIENCE

##### DEVELOPER

11/2024 - 11/2025

##### Haposoft

- Develop and maintain web applications using Laravel, VueJS, and Django.
- Implement CRUD features, fix bugs, and refactor existing codebases.
- Perform database updates using Laravel migrations and work with PostgreSQL/MySQL.
- Write unit tests for Laravel using PHPUnit.
- Handle UI updates and minor fixes for VueJS/ReactJS components.
- Manage tasks and bugs with Trello, collaborate via Git/GitHub.

##### DEVELOPER

10/2022 - 09/2024

##### JVB Company

- Fixbug in the Laravel codebase.
- Implement CRUD (Create, Read, Update, Delete) functions in Laravel.
- Perform database update using migrations.
- Refactor and rework existing codebase in Laravel and VueJS
- Write unit tests for Laravel code using PHPUnit
- Address minor bugs and tasks related to VueJS/ReactJS components.
- Plan and prioritize tasks and bugs with Trello.
- Collaborate with team members and other client developers using Git/Github for version control and code collaboration.

#### EDUCATION

##### MATERIAL ENGINEERING

09/2019 - 09/2022

##### HaNoi University of science and technology

##### INFORMATION TECHNOLOGY

09/2022 - Present

##### HaNoi University of science and technology

Major in Software Engineering

#### PROJECTS

##### E50 - DARTSLIVE

04/2025 - 11/2025

##### Description: A platform to connect darts players

Members: 3

Role: Developer, maintainer.

Responsibilities:

- Clarify business requirements, then translated them into technical specifications for implementation.
- Developed backend modules and REST APIs using Django and Python.

- Strong communication and teamwork.
- Quickly grasp the working process and company culture.

- Debugged and fixed issues in API endpoints and JavaScript frontend integration.

## **P8187 - MARKETPLACE**

**11/2024 - 03/2025**

### **Description: Portia's clothing marketplace project**

Members: 5

Role: Developer, maintainer.

Responsibilities:

- Collected and analyzed requirements for marketplace features (product listing, cart, checkout).
- Built backend features with Laravel and PostgreSQL, integrated with VueJS frontend.
- Deployed and managed services on AWS EC2 and stored assets on AWS S3.
- Implemented responsive UI components and API integration in JavaScript (VueJS).
- Conducted testing, bug fixing, and participated in code review to improve code quality.

## **DOTTREES**

**07/2023 - 09/2024**

### **Description: Developing online learning web applications for children.**

Members: 4

Role: Developer, maintainer.

Responsibilities:

- Fixbug in the Laravel codebase.
- Implement CRUD (Create, Read, Update, Delete) functions in Laravel.
- Perform database update using Laravel migrations.
- Refactor and rework existing codebase in Laravel and VueJS
- Write unit tests for Laravel code using PHPUnit
- Address minor bugs and tasks related to VueJS components.
- Plan and prioritize tasks and bugs with Trello.
- Collaborate with team members and other client developers using Git/Github for version control and code collaboration.

Technology: Laravel, Docker, VueJs3, Zoom, Stripe Payment, API, S3, EC2, Elastic Beanstalk, RDS(MySQL).

## **AUDITING MAGAZINE**

**03/2023 - 08/2024**

### **Description: Online magazine updates news.**

Members: 3

Role: Developer, maintainer.

Responsibilities:

- Fixbug in the Laravel codebase.
- Implement CRUD (Create, Read, Update, Delete) functions in Laravel.
- Perform database update using Laravel migrations.
- Plan and prioritize tasks and bugs with Trello.
- Collaborate with team members and other client developers using Git/Github for version control and code collaboration.

Technology: PHP, Laravel, Linux Centos, JQuery, MySQL, GA4.

## **KDDI - COUPON**

**01/2023 - 06/2023**

### **Description: Commercial storage and management system.**

Members: 4

Role: Developer, maintainer.

Responsibilities:

- Fixbug in the Laravel codebase.
- Implement CRUD (Create, Read, Update, Delete) functions in Laravel.
- Perform database update using Laravel migrations.
- Plan and prioritize tasks and bugs with Trello.
- Collaborate with team members and other client developers using Git/Github for version control and code collaboration.

Technology: PHP, Laravel, Docker, Linux Centos, JQuery, MySQL.

## **PHONE E-COMMERCE**

**10/2022 - 03/2023**

**Description: System for storing and trading technology products.**

Members: 3

Role: Developer, maintainer.

Responsibilities:

- Fixbug in the ReactJS codebase.
- Implement CRUD (Create, Read, Update, Delete) functions in NodeJS.
- Perform database update using migrations.
- Plan and prioritize tasks and bugs with Trello.
- Collaborate with team members and other client developers using Git/Github for version control and code collaboration.

Technology: JavaScript, ReactJS, NodeJS, JQuery, MongoDB, Docker.
