CAREER OBJECTIVE

I am a graduate of FPT College with a major in Web Backend Programming, with 1 year of practical experience working at startups on backend PHP Laravel, MySQL, and API as well as frontend React.js, Vue.js. I am looking forward to applying for the position of PHP Developer to leverage my skills in full-stack web development. With practical experience in team management and task direction, I aim to become a professional Full Stack Developer, contributing to the company's growth and development.
