PREVIOUS PROJECTS

2 / 2025 - Currently
Admin Page Ecommerce - Personal project
Link Git : https://github.com/PhamNamWk/Admin-Page-Ecommerce
The project manages the following tables: Categories, Products, and Users. All features are developed following the OOP MVC architecture, combined with several libraries such as doctrine/dbal, bramus/router, bladeone, validation, and phpDotENV.

11 / 2024 - 12 / 2024
TechZ Electronics E-commerce Website - Group Project
Link Git : https://github.com/PhamNamWk/ztech
This project was developed by a team of 2 members. The website was built with pure PHP using the MVC model. The project successfully implemented the user order flow and the admin-side data and information management.
